

Company Profile Calibrate

Calibrate is focused on delivering end-to-end communication solutions: from web-sites, over iDTV, to mobile and other interactive platforms. We complement our services by partnerships with best-of breed solution vendors and state-of-the-art technologies.

Our team consists out of energetic consultants who bring skills and experience to different projects; from small-scale explorations to enterprise-wide solutions.

Technology addiction – Result oriented

Commitment, drive and enthusiasm make our consultants the best in their domain. Opensource or commercial tools. We use the best available solutions that fit timing and budget of our customer.

Research and Development

The cornerstone of our expertise remains research and development of different emerging technologies in the field of new media. Together with our partners we will challenge technology with business value.

Customer relations

Calibrate can provide its services in different operational modes. We can work in consultancy or in project mode; deliver in the field coaching or whatever formula or combination that fits best.

Working for Calibrate

At calibrate, you will find the energy and entrepreneurship of a startup combined with the benefits of a large organization. A constant flow of new projects and technologies gives you an opportunity to carve out a highly individual career.
